

## Solstice Biathlon Race, 22 December 2006

Race was an Individual Format race with each racer shooting four times and skiing five laps (fairly brutal for the prevailing wind and temperature conditions today); penalty assessed for each missed target was 40sec added to time. Racers age 10-12 (younger junior) shot only from the prone position and at larger targets, 5x1.0km race course (5.0km); those age 13/14 (junior boys/girls) shot from prone position at standard size targets (45mm), 5x1.5km course (7.5km); those age 15+ (senior boys/girls, youth men, master men) shot PSPS at 45mm prone and 115mm standing targets, 5x2.1km course (10.5km). Two juniors raced up a class in senior class. In considerable part because of the strong winds, shooting results today were poor.
