

NSAA Ski SWAP

Registration Details

Registration is now online through Flash Consign. All you need to do is create an account and join our sale.

Please read the easy steps on how to create an online account and pay particular attention on how to place tags on items.

This is how the swap works:

1. **Create an account:** The link on the webpage will take you to the NSAA Ski SWAP and see below to walk through the steps on how to create an account.
2. **Register your items:** Once you have created an account you can immediately register your items for the sale. You can enter as many items as you want. Fill-out the required information and include a detailed description. Note that you can re-edit information regarding an item. You can also completely delete an item.

When registering each item, sellers can indicate whether to donate the item if it does not sell during the swap instead of picking up the item(s) after the sale. Unsold items not picked up on Sunday following the sale between noon-1pm will be donated to organizers.

* If you are considering donating item(s), please do so prior to the start of the swap. 100% of proceeds from donations benefit your local ski club. Tax deductible forms available.

3. **Print your tags:** As you open an account, you will be issued a seller ID. This ID will be on each item tag so that your items can be tracked during the sale. It's not a bad idea to remember your ID for later.
4. **Securely attach tags to your items*:** It is very important that you securely attach your tags to your items. When printing your tags we strongly recommend that you use card stock paper. You can use regular paper but you will need to reinforce your tags with cereal box style carton (except if tags are for skis). When reinforcing your regular paper tags with carton, do not use liquid glue. We recommend clear packaging tape.

Place tags on your items using clear packaging tape and **avoid taping over the barcode**. Two-part items (boots, gloves) must be attached together with heavy twine string.

Please follow these instructions/recommendations on how to place the tags for the following items:

- a. **Ski Boots:** Print 2 tags (one for each boot). Put tags on the back of the boot above the heel and tape the whole tag to the boot. Do not tape over the bar code. Use string to secure both boots together.
 - b. **Skis:** Print 2 tags (one for each ski). Place tags flat on the top of the skis below the tip. Do not tape over bar code.
 - c. **Poles:** Tape poles together. Tape tag around the poles.
 - d. **Clothing:** Make sure to print on card stock paper or reinforce your paper tags with a piece of cardboard. All tags should be attached to items with a string. Whenever possible tags should be placed on the inside clothing tag or on the main zipper. If using a pocket zipper, please use the left pocket (this will allow for better organization during the swap). If your item does not have a good spot for string, consider safety pins.
 - e. **Others:** We trust your judgment on doing your best to securely place your tags on your items. Again, understand that we do not take responsibility for poorly tagged items.
5. Once all your tags are printed and securely placed on your items, you are ready to drop off your gear a day or two before the swap (preferred) or on day of the swap a few hours before the sale. Check the times listed and be sure to be early.

****Please note that if an item tag comes off during the sale, this item will not sell as there will be no way to track it. This also means your item will most likely end up in the donation pile! It is the seller's responsibility to properly place and securely tag items for sale.***

Swap workers will place the equipment onto the sales floor for the sale. When the sale begins expect hundreds of shoppers to be on the sales floor shopping for bargains.

The ski swap is a CONSIGNMENT sale. The seller will put his/her equipment onto the sales floor at the risk of the seller. THE EVENT ORGANIZER WILL NOT BE RESPONSIBLE FOR LOST OR STOLEN ITEMS.

It is the responsibility of the seller to mark and package items securely to reduce loss.
